

# Coronavirus vaccinations in Turku

Coronavirus vaccinations are now underway in Turku. These vaccinations are voluntary and free of charge to persons living permanently in Finland.

In Turku, the vaccinations have begun among elderly Turku residents who are over 80 years of age. The oldest age groups are being vaccinated first, and after that vaccinations will be continued during the entire spring period among younger age groups.

Citizens are reserving vaccination appointments themselves, either via the electronic appointment service or coronavirus vaccination telephone service. It is always necessary to book a vaccination appointment, either electronically or by phone.
