Requests re- garding the place of early childhood edu- cation	1. 2. 3.
Additional infor- mation	
Service voucher	<p>The municipality uses a service voucher arrangement to provide early childhood education services as an alternative to municipal services. Service vouchers can be issued to children who are eligible for day care services and use the services of private day care centres. Issuing a service voucher is based on the as- sessment of the child's need for day care.</p> <p>Day care service vouchers are issued individually to each child. It is not possible to receive both private care allowance and home care allowance for arranging the child's care at the same time.</p> <p>The value of the income-based service voucher depends on the child's age, weekly care hours and the family's level of income. The value of the service voucher is the determined by subtracting the euro amount the family would pay for municipal day care services from the price cap.</p> <p>The deductible the customer is responsible for is the difference between the day care fee charged by the provider and the value of the service voucher. For more information about service vouchers, please refer to www.turku.fi/paivahoidonpalveluseteli.</p>
Rights of the customer	<p>Customers have the right to know why and for what purpose the information provided by them is re- quired, to whom the information is regularly disclosed and in which personal register maintained by the controller as specified in the Personal Data Act the information is stored (Act on the Status and Rights of Social Welfare Clients).</p> <p>Customers have the right to check the information concerning them in the customer register (Personal Data Act)</p> <p>Your information will be stored in the enterprise resource planning system of the early childhood edu- cation department.</p>
